INCREDIBLE WATER

— FROM EVERY FAUCET

Veterans Plumbing

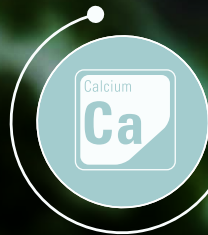

The Experts You Can Trust Since 1967

DO YOU KNOW WHAT'S IN YOUR WATER?

THE 3 C'S IN WATER HARMING YOUR HEALTH AND HOME

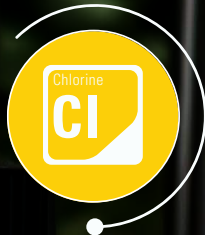

1 CALCIUM (HARD WATER)

Hard water containing calcium ions, can lead to troublesome mineral deposits in your home, greatly reducing the life of your water heater, dishwasher and washing machine. It can also cause unsightly lime scale buildup on fixtures, glassware and shower glass.

2 CHLORINE OR CHLORAMINE

Your city's water treatment process employs either chlorine or chloramine as chemical disinfectants. This effectively eliminates bacteria but causes unpleasant tastes, odors, and the formation of harmful byproducts. These disinfectants are also harsh on skin, hair and even plumbing fixtures.

3 CHEMICALS

A wide range of chemical contaminants are showing up in water supplies, from pharmaceuticals and VOCs to PFAS, lead, and trihalomethanes. Most of these contaminants could have significant negative effects on your health and well-being.

SOLUTIONS TO THE 3 C'S IN EVERY HOME

ADDRESSES THE FOLLOWING 3 C'S

 Calcium |  Chlorine-or-  Chloramine |  Chemicals

ADDRESSES THE FOLLOWING

REIONATOR^{PRO} ULTRA

For those who refuse to compromise on quality, the Reionator Pro Ultra[®] is for you. It is the top shelf of all water improvement products - it has no peers. Addressing hardness, disinfectants and chemicals, it does it all. In short, the Reionator Pro Ultra[®] is everything you want.

ADDRESSES THE FOLLOWING

SORBMAX^{PRO}

The SorbMax Pro[™] is a premium whole-house water filtration system that effectively addresses disinfectants, chemicals, and contaminants. You and your family will finally enjoy the great-tasting, healthier water you deserve.

REIONATOR^{PRO}ULTRA

If your standards for quality are unwavering, the Reionator Pro Ultra[®] is your ultimate choice. It stands unrivaled atop the spectrum of water filtration solutions, offering an unparalleled experience. With the Reionator Pro Ultra[®] in place, luxurious water flows through every faucet in your home, enhancing and enriching every aspect of your life.

Smoother, Cleaner Skin and Hair

Did you know that the water you use to wash your face could be affecting your skin's pH balance? Hard water, containing minerals like calcium and magnesium, can disrupt the natural acidity of your skin, leaving it feeling dry, irritated, and prone to breakouts. Chlorine can also cause dry, itchy skin, damage hair, and irritate eyes.

The Best of the Best

The Reionator Pro Ultra[®] is the ultimate water filtration system for your home, bar none. Say goodbye to harmful chemicals lurking in your water supply and hello to excellent water from every tap.

Protect Your Home

Experience peace of mind knowing your appliances, faucets, glass and plumbing are protected from the very harmful effects of hard water scale build up. Enjoy a luxury that truly pays for itself.

Experience Water Excellence

It's not just about clarity; it's about purity. Don't take chances with your family's safety. Our advanced water filtration system reduces impurities, ensuring you have cleaner, safer water.

Not your Standard Soft Water

Unlike other water softeners that leave a slippery, slimy feeling behind, our technology offers a superior solution. Say goodbye to that unpleasant residue and hello to pure, clean water that feels just right.

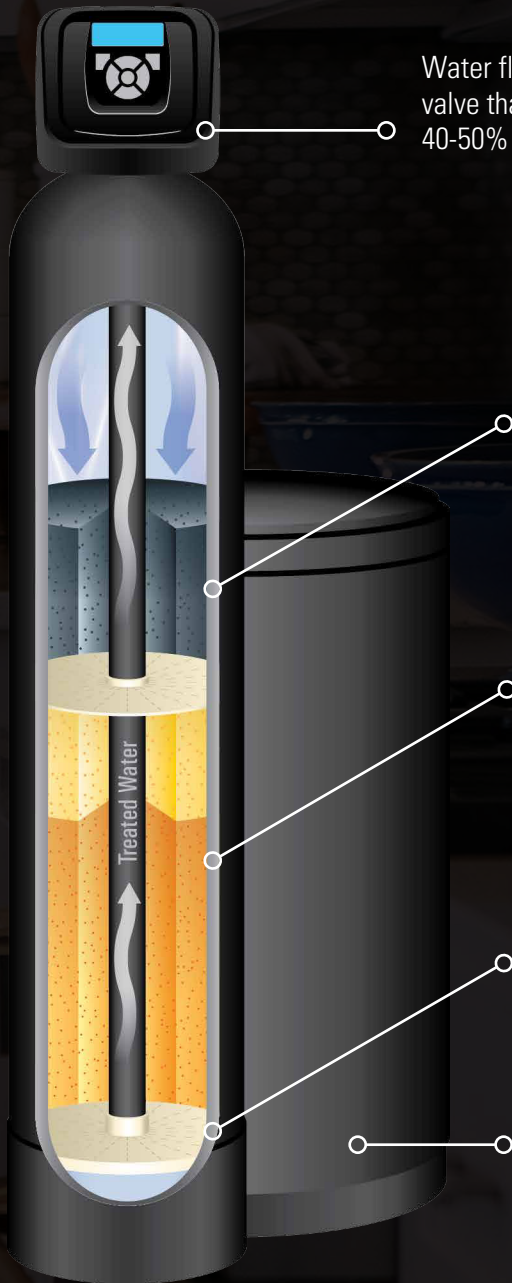

Better for the Environment & Budget

Say goodbye to single-use plastic water bottles and embrace sustainability. With bottled-quality water available from every tap in your home, you can enjoy clean, delicious water without waste.

HOW IT WORKS

Scan here to watch a video and learn more!

Water flows into the system through the industry-leading Triton control valve that anticipates usage and self-initiates cleaning, making it 40-50% more efficient in energy, water and salt conservation.

Water then flows into the upper chamber of the industrial-grade composite tank and through the TechSorb media blend addressing chlorine, chloramines, VOCs, disinfection byproducts, and other emerging contaminants (certified to NSF 61).

Water flows to the lower chamber and through the TechSelect and TechSoft dual resin bed addressing any residual chlorine and “slippery” soft water feel, then reducing or removing hardness, iron and lead (certified to NSF 42/44).

Clean, filtered water then flows effortlessly through the efficient AquaHelix™ plate and is delivered to your home providing better tasting, healthier water and cleaner laundry, softer skin, easier cleaning, as well as soap, energy, and appliance savings.

When the Triton control valve indicates the TechBlend resin needs to be cleaned and recharged, it automatically initiates the process using salt solution from the brine tank, in concert with the AquaHelix™ plate, to efficiently lift and clean the resin while providing significant salt and water savings due to its revolutionary design.

HOW IT WORKS

Water flows into the system through the industry-leading Triton control valve that anticipates usage and self-initiates cleaning, making it 40-50% more efficient in energy, water and salt conservation.

Water then flows into the industrial-grade composite tank and through the positively charged TechSelect resin addressing chlorine and the "slippery" soft water feel (certified to NSF 42).

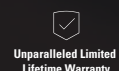

Next, water flows through the negatively charged TechSoft resin, removing hardness and reducing iron and lead (certified to NSF 44).

Clean, filtered water then flows effortlessly through the efficient AquaHelix[™] plate and is delivered to your home providing better tasting, healthier water and cleaner laundry, softer skin, easier cleaning, as well as soap, energy, and appliance savings.

When the Triton control valve indicates the TechBlend resin needs to be cleaned and recharged, it automatically initiates the process using salt solution from the brine tank, in concert with the AquaHelix[™] plate, to efficiently lift and clean the resin while providing significant salt and water savings due to its revolutionary design.

REIONATOR[®] PRO

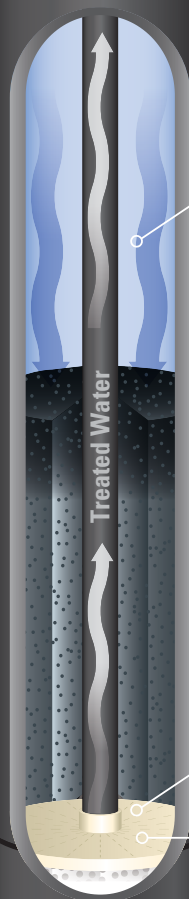

SORBMAX^{PRO}

Great tasting, safe, healthy water is possible. Yet, often times water can have disinfectants, chemicals and significant other contaminants that cause foul odors, bad tastes and can cause negative long-term effects. For whole-house water filtering that leaves your water tasting better, smelling better, and healthier to drink, look no further than the SorbMAX Pro. It is a superior system designed to effectively reduce or remove chloramines, chlorine, dissolved organic contaminants (including synthetic organic chemicals), metallic tastes, foul odors and other troublesome contaminants that affect water quality.

HOW IT WORKS

Water flows into the system through the industry-leading Triton control valve that anticipates usage and self-initiates cleaning, making it 30% more efficient in energy and water conservation.

Water then flows into the industrial-grade composite tank and through the TechSorb media blend addressing chlorine, chloramines, VOCs, disinfection byproducts, and other emerging contaminants.

Clean, filtered water then flows effortlessly through the efficient AquaHelixTM plate and is delivered to your home providing great tasting, healthier water and softer skin, silkier hair, and no chlorine odors.

When the Triton control valve indicates the TechSorb media needs to be cleaned, it automatically initiates the process using a very effective backwash flow, in concert with the AquaHelixTM plate, to efficiently lift and clean the media while providing significant water savings due to its revolutionary design.
